DIGITAL DEFENSE TO EXHIBIT FRONTLINE™ SOLUTIONS AT CA WORLD® 2007

Digital Defense offers a broad array of risk and threat assessment services to enterprises seeking independent, third-party evaluations of IT networks for objective Security Compliance reporting and effective corporate-wide risk mitigation programs.

SAN ANTONIO, TX, April 16, 2007 – Digital Defense, Inc., a provider of information security risk management services, will exhibit its Frontline™ Managed Service offerings at CA WORLD® 2007. Digital Defense will be exhibiting in booth #725.

Digital Defense is the service provider of choice for financial institutions and enterprise organizations looking to increase protection of information assets for the benefit of their customers, shareholders, and employees by having enterprise risk and threat assessments performed by a trusted security partner. With Digital Defense's Managed Service offerings, companies can further augment their corporate security team, enjoying seamless service, and support for both Security and IT personnel across their enterprise.

“Many companies are finding that the diversity and volume of information security threats they now face are overwhelming the abilities of their internal IT staff,” said Bill Taub, vice president of enterprise security at CA. “Digital Defense’s service offerings can help these customers by supplementing their internal staff and providing valuable security expertise.”

“I am very excited about our participation at CA WORLD 2007,” said Larry R. Hurtado, president and CEO of Digital Defense, Inc. “We look forward to discussing our solutions and our service delivery platform, Network Security Awareness System (NSAS), with attendees of this very important conference. We believe that we can help companies increase the overall effectiveness and efficiency of their information security risk mitigation programs through the combination of Digital Defense’s Managed Services and CA’s powerful enterprise software solutions.”

Digital Defense’s Service Oriented Architecture-based (SOA-based) service delivery platform, NSAS, and SOA-based Application Programming Interfaces can integrate with CA software. Digital Defense utilizes proprietary technology and industry best practices to deliver their threat management solutions to clients. This technology-based service
