DIGITAL DEFENSE RELEASES 3.6 VERSION OF FRONTLINE™

San Antonio, TX – April 23, 2007 – Digital Defense, Inc., a provider of threat management and security information management services, today announced the newest release of their flagship offering, Frontline. The Frontline 3.6 release is largely comprised of client-requested enhancements including, but not limited to new reporting capabilities. These new capabilities address additional requirements submitted by client information security and internal auditor teams wanting to further expand their ability to evaluate historical information related to vulnerability remediation progress in the enterprise.

“We value feedback from our clients. The delivery of the Frontline 3.6 release content represents our desire to effectively respond to our clients’ needs,” stated Larry R. Hurtado, president and CEO of Digital Defense. “We are in the midst of several cutting-edge Frontline releases scheduled for this year. Regardless of whether or not clients sign-up for Digital Defense Managed Services or client-managed subscription offerings, the continued enhancement of Frontline enables us to help clients effectively respond to their ever-changing Security Compliance and Risk Management environments.”

The Frontline secure web portal and the underlying Network Security Awareness System (NSAS) platform are based on an SOA-based design framework. The NSAS architecture facilitates the Company’s ability to rapidly incorporate new features and services into the system in response to client, market, and industry needs.

About Digital Defense

Digital Defense, Inc., a privately held firm based in San Antonio, Texas, delivers a comprehensive portfolio of risk management services including information security programs, regulatory compliance solutions, security testing of IT products and security education offerings to financial institutions and enterprises that utilize Internet Protocol-based technology in their business operations. Digital Defense and its Security Operations team uses proprietary technology and industry best practices to deliver a broad array of services to its clients, which range from small financial institutions to global Fortune enterprises. Frontline™, Digital Defense’s flagship service portal, provides clients with instant access to a security information management platform that enables independent oversight of their organization’s security posture on an autonomous
