## **DIGITAL DEFENSE ANNOUNCES NEW SECURITY SOLUTION RELEASE**

**San Antonio, TX – August 31, 2010** – [Digital Defense, Inc.](#) (DDI), a leading provider of information security governance, risk management, and compliance (GRC) solutions, today unveiled a new security solution known as [Remediation Manager-Pro](#) (RM-Pro). DDI designed this comprehensive offering to help organizations remediate security vulnerabilities on their computing platforms. The result is that client organizations improve network security posture, reduce loading on IT staff, and can focus resources on other key IT business functions.

“We are very pleased with the RM-Pro service from DDI,” stated Bill D’Camp, Director of IT at Honda Federal Credit Union. “After implementing RM-Pro, we have achieved a significant improvement in our overall security posture. In addition, we have saved an incredible amount of staff time and money. RM-Pro has provided us with a cost-effective way of addressing vulnerabilities which, in turn, further protects our members’ confidential information.”

With the addition of the [DDI RM-Pro solution](#), DDI not only identifies what clients need to do with vulnerabilities discovered, but also provides an action plan whereby DDI Security Analysts will securely remediate discovered vulnerabilities on behalf of the client.

“We developed the RM-Pro service because we understand the pressure clients are under to do more with fewer resources in the current economic climate,” explained Larry Hurtado, CEO of Digital Defense. “With RM-Pro we are providing organizations with an affordable, frequently-requested service that reduces the risk of unauthorized persons compromising the integrity of our clients’ business operation. We are offering RM-Pro for both current DDI Vulnerability Scanning clients as well as for new clients. For new clients we include a full network [Automated Vulnerability Scan](#) to identify the vulnerabilities as a first step.”

[RM-Pro](#) offers the following features:

- Pre- and Post-Remediation Analysis Report
- Robust, Detailed Project Plans
- Online Remediation tracking and Audit Notes

- Security GPA<sup>®</sup> Trend Reporting

**About Honda FCU**
