DIGITAL DEFENSE ANNOUNCES LARRY HURTADO AS PRESIDENT AND CEO

San Antonio, TX – June 26, 2006 – Digital Defense, Inc., a provider of network security compliance and risk management services, today announced the promotion of Larry Hurtado to President and CEO. Previously, Larry was President and COO.

Larry commented that he is excited about his new responsibilities. “We continue to see that our online security information management platform combined with our highly-skilled network security analyst team enables us to effectively respond to the diverse security compliance and risk management needs of our clients and business partners,” stated Larry. “We believe that our clients and business partners deserve responsive and effective technical support, solutions that remain current to effectively fend off ever-changing security threats, and a service offering that is refreshed on an ongoing basis to address evolving regulatory requirements. For these reasons, we continue to invest in the enhancement of our Frontline™ service offerings and the training of our staff. We believe that this investment is something that our clients and our business partners should expect in any partnership that they form to ensure that their current and future security compliance and risk management needs will be met.”

Before joining Digital Defense in August 2002, Larry was Co-Founder and President of International Operations for Elastic Networks, Incorporated, holding several key leadership positions in support of the company's business growth objectives, three financial events—two private rounds of financing and an initial public offering, and the successful acquisition of the company by Paradyne Corporation in March 2002.

Prior to Elastic Networks, Larry held senior management positions at Nortel Networks. His last assignment was VP of Business Line Management in Nortel Networks’ Access Networks Division. He has held international assignments in Hong Kong and Tokyo to lead organizations in the establishment or growth of their Asia Pacific businesses.

Larry holds a BSEE degree from the University of Tennessee at Knoxville.

About Digital Defense

Founded in 2000, Digital Defense, Inc. provides affordable security solutions that allow executives and IT personnel to assess their network security condition, manage their IT risk, and validate deployed infrastructure. Frontline™, a web portal supporting a

comprehensive suite of security applications, provides access to a superior security information management platform with a trusted and independent team of security analysts who provide continually updated market-specific vulnerability analysis. The Digital Defense team is comprised of recognized security experts who focus on specific markets, through which they garner a better understanding of client needs in an environment of increasingly complex security threats. Based in San Antonio, Texas, Digital Defense has over 400 clients nationwide.
