Digital Defense announces special co-branded offering for clients of Marketing Solutions

San Antonio, TX – October 9, 2006 – Digital Defense, a provider of security compliance and risk management services, announced today that their partner, Marketing Solutions, Inc. (MSI), a provider of browser-based CRM software solutions, will begin aggressively promoting the Security Training, Education and Awareness Module (TEAM™) from Digital Defense to all Marketing Solutions clients. Digital Defense launched the Security TEAM service in July 2005 and has seen widespread, cross-market embrace of this educational offering. Currently over 180 organizations have enabled this training solution on their websites resulting in over 1.6 million hits per month on the Security TEAM platform.

“As a TEAM client ourselves, we are thrilled that Digital Defense is making this valuable on-demand service available to our customers. When you couple the educational content of the Security TEAM platform with the special incentives that we have in place for organizations that want to rapidly deploy this service offering, the benefits to our client, and our client’s online user community is significant,” stated Josh Dennis, Executive Vice President at Marketing Solutions. “We want to help our clients and their online users become more security aware. Security TEAM from Digital Defense will allow our clients to quickly roll out this powerful security education program to their client bases.”

Security TEAM is a solution that enables organizations to arm their clients who use online services with the fundamental security education they need to avoid cyber-threats, and thus feel comfortable making use of the investment the organization has made in their online services. Current topics contained within the TEAM application are Online Shopping, Online Banking Myths, ATM and Debit Card Misuse, Online Fraud, Passwords, Viruses/Worms, Trojans & Spyware, Home Firewalls, Securing Home Computers, and Secure Transactions Away from Home. There is a special section related to how to keep from becoming a victim of ID theft and what to do if you fall prey to ID theft. Digital Defense adds new courseware to the TEAM solution every quarter.

“I am pleased about this next phase of our partnership with Marketing Solutions,” said Patrick Shannon, Vice President of Sales at Digital Defense. “Marketing Solutions understands that their customers have a need for easy-to-deploy and effective security education solutions. We are very excited that they have elected to rollout Digital Defense’s Security TEAM™ as the product of choice.”

Digital Defense and Marketing Solutions have both served financial institutions since 2000. Initially, Marketing Solutions was a client using Digital Defense's services. They formally announced their partnership in June 2006, in order to provide Marketing Solutions' clients with the ability to purchase Digital Defense's security compliance offerings as a group.

About Marketing Solutions, Inc.

Marketing Solutions, Inc. began meeting demands for affordable, web-based and completely outsourced solutions among community financial institutions in 2000. From its center of operations in Birmingham, Alabama, the company quickly became, and continues to be the fastest growing provider of Customer Relationship Management (CRM) solutions for community financial organizations. Connections (CRM) from MSI is trusted by a growing number of national clients that now exceeds 150 financial institutions due to its proven ability to cultivate profitable growth and the unmatched support MSI provides.

Through a core processing system interface, Connections (CRM) offers daily data updates tailored to the specific needs of a community based financial organization. Connections empowers an institution through its innovative design that melds robust, reliable and comprehensive serviceability with user focused, efficient functionality. Financial organizations with Connections know, understand and respond to their customers needs with relevant offerings through a resourceful format that employs accurate analysis and automated proficiency. Simply stated, Connections makes financial relationships more profitable for everyone.

About Digital Defense

Founded in 2000, Digital Defense, Inc. provides affordable security solutions that allow executives and IT personnel to assess their network security condition, manage their IT risk, and validate deployed infrastructure. Frontline™, a web portal supporting a comprehensive suite of security applications, provides access to a superior security information management platform with a trusted and independent team of security analysts who provide continually updated market-specific vulnerability analysis. The Digital Defense team is comprised of recognized security experts who focus on specific markets, through which they garner a better understanding of client needs in an environment of increasingly complex security threats. Based in San Antonio, Texas, Digital Defense has over 500 clients nationwide.
