DIGITAL DEFENSE RELEASES NEW VERSION OF EDUCATIONAL SERVICE

San Antonio, TX – July 24, 2006 – Digital Defense, Inc., a provider of network security compliance and risk management services, today announced the latest release of their popular educational offering, Security Training, Education and Awareness Module (TEAM™). This release consists of two new courses, which are entitled Online Banking Myths and ATM and Debit Card Misuse. Security TEAM is a solution that enables organizations to arm their clients who use online services with the fundamental security education they need to avoid cyber-threats, and thus feel comfortable making use of the investment the organization has made in their online services.

“Digital Defense is pleased to present these two new courses as part of the TEAM service offering.” said Larry R. Hurtado, President and CEO of Digital Defense. “We provide our clients benefit through our continued investment in the evolution of our products and services. The TEAM courseware, which we enhance each quarter, provides additional value as clients strive to reach their regulatory compliance goals through the education of their online patrons. Our focus at Digital Defense is to provide financial institutions as well as small, medium and large-scale enterprises with the tools that they need to secure their networks and efficiently manage the business risk and security compliance challenges associated with today’s environment.”

TEAM currently consists of courseware, associated tests, and completion certificates in the following categories: Online Fraud, Passwords, Viruses/Worms, Trojans & Spyware, Home Firewalls, Securing Home Computers, and Secure Transactions Away from Home, in addition to the two new courses. There is a special section related to ID Theft topics as well. Furthermore, the Security TEAM solution provides organizations with statistics on customer usage of the training offering. Digital Defense enhances the TEAM service with additional courses each quarter. TEAM is now available to over 5.5 million online users nationwide through our clients’ TEAM-enabled websites.

About Digital Defense

Founded in 2000, Digital Defense, Inc. provides affordable security solutions that allow executives and IT personnel to assess their network security condition, manage their IT risk, and validate deployed infrastructure. Frontline™, a web portal supporting a comprehensive suite of security applications, provides access to a superior security information management platform with a trusted and independent team of security

analysts who provide continually updated market-specific vulnerability analysis. The Digital Defense team is comprised of recognized security experts who focus on specific markets, through which they garner a better understanding of client needs in an environment of increasingly complex security threats. Based in San Antonio, Texas, Digital Defense has over 400 clients nationwide.
