## **DIGITAL DEFENSE RELEASES SPANISH VERSION OF EDUCATIONAL SERVICE**

**San Antonio, TX – January 30, 2006** – Digital Defense, Inc., a provider of network security vulnerability and penetration testing services, today announced the release of the Spanish version of their Security Training, Education and Awareness Module (TEAM). TEAM is a solution that enables Credit Unions to arm their members with the fundamental security education they need to avoid electronic threats, and thus feel comfortable making use of the investment the Credit Union has made in online services.

“As long-time customers of Digital Defense, we have seen that they are constantly striving to upgrade their security suite in both their product and service offerings,” stated Eve Hernandez, Vice President of Marketing at San Antonio City Employees Federal Credit Union (SACEFCU). “The addition of the Spanish version of TEAM makes this educational tool even more valuable to us and allows us to reach more of our members. Furthermore, the use of TEAM not only provides our members with helpful information, but it also helps us to comply with NCUA regulations. This offering will also help SACEFCU in our efforts to reach out to the Hispanic market, especially the unbanked and new Americans, one of our long-term strategic initiatives.”

TEAM currently consists of courseware, associated tests and completion certificates in the following categories: Online Fraud, Passwords, Viruses/Worms and Trojans & Spyware. There is a special section related to ID Theft topics as well. Furthermore, the Security TEAM solution provides credit unions with statistics on member usage of the training offering. Digital Defense enhances the TEAM service with additional courses each quarter.
